

On occasion of the year 2019 declared Year of the autochthonous languages by the UN the Ladin cultural association Lia culturala Fanes has launched a digital project to promote both the Ladin legends of the Dolomites, the most ancient cultural heritage in the Ladin oral tradition and the safeguard of Ladin language. The website Dolomites Legends *dolomiteslegends.it* in four languages -Italian, German, Ladin and English- presents the contents of the main Ladin legends, sorted based on their belonging to the areas of the Nature Parks of the Dolomites, with multimedia contents and visualisation of the places of the legends. Many contents are related to the Ladin literary texts in the digital library of Wikisource edited by Wikimedia Italia. A direct access to the contents will be possible through the QR-Codes set in the places of the legends and in cultural and touristic institutions in the Ladin valleys. The project has got the Patronage of the Foundation Dolomites UNESCO and will be presented officially on 11. August at 3. p.m. at the entrance of the Nature Park Fanes -Sennes -Braies near the Capanna Alpina in S.Cassiano -Alta Badia.
